## YOUR SHIPYARD SOLUTION IN SOUTHERN SPAIN

# Who are we?

## ► THE COMPANY

**PULCHRA MARE,**  
Shipping and Agency d.o.o.

Let us kindly introduce you to the Pulchra Mare group's latest exciting challenge. **At the end of February 2017, the PULCHRA MARE GROUP acquired the shipyard concession for SEVILLA**, which includes the dry dock, the quay, the buildings and corresponding facilities.

**PULCHRA MARE** is a Slovenian based company with international backing and its regional operational **office based in ALGECIRAS Spain**. The scope of its maritime services include **agency, crewing, ship management, repairs & assistance afloat and General Ship Supplies**. Given the growing market and geographical potential due to the proximity of the **Straits of GIBRALTAR**, the group searched for a candidate platform to initially develop ship repairs and then in the long term the potential for new building. **The shipyard of SEVILLA** was deemed to be that suitable candidate, undergoing a major upgrade to the site since our acquisition. The reasons for this choice were the availability of a dry dock of this size (**for vessels up to 144 x 23,5 m**), the local infrastructure of the port of SEVILLA and the fact that the area is to become a free trading zone in the very near future.

In our view, there is a very bright future for the shipyard; one we want to share for the long term to build a lasting and confident relationship with our Customers, close neighbouring companies and public authorities together with our suppliers and subcontractors.

# What do we do?

## ► FOCUSING OUR PLANNING FOR AN EFFICIENT AND PROFESSIONAL SERVICE

At Astilleros del Guadalquivir we are entirely at your disposal to provide you with **Shipyard solutions 24 hours a day and for 365 days a year.**

Our main focus is **ship repairs and new building** but we have also added our **General Supplies Division** to complete the provision of services to our Customers. **SERVICES FOR Painting, Sand Blasting, Steel & Pipe works, Electrical & Electronics, Special Mechanical Assistance for the Engines and/or Turbo Charger Overhauls, HVAC, Accommodation and Insulation testing .... etc., are our daily offerings.**

The afloat assistance is provided mostly in **SEVILLA** and the vicinity Ports like **ALGECIRAS, GIBRALTAR, CADIZ and ALMERIA** but we **also can organize to attend services in the rest of Ports in SPAIN, PORTUGAL OR NORTH MOROCCO (Tanger, Casablanca, Agadir)** and in route or abroad when is requested.

### **Special assistance and other services that we can offer are:**

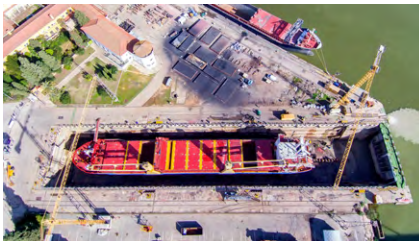

- Docking vessels on higher blocks to access retractable devices.
- Ship recycling complying fully with environmental requirements in force in the European Union.
- Ship supplies and spares.
- Logistics.
- Customs clearance at any Port/Airport in Spain and Gibraltar.
- Dedicated ship recycling & waste management.
